SUBJECT INDEX

Acetic acid
Proton transfer between acetic acid and methylamine in aqueouss solution. Ab initio and molecular dynamics study of free energies of hydration 247
Amino acids
Retinal Schiff bases with aromatic and aliphatic amino acids — the extremely different nature of the intramolecular hydrogen bond between the two types of compounds 11
Ammonia
Ab initio molecular orbital calculations of the infrared spectra of hydrogen-bonded complexes of water, ammonia and hydroxylamine. Part 11. The atomic polar tensors and their invariants, of the monomers and the binary hydrogen-bonded complexes 417
Anions
Hydrogen bonding with anions. The problems of structure and solvation 325
Autoassociates
Proton transfer in autoassociates and hydrates of pyrimidine bases: an MNDO/M study 459

1,8-Bis(dimethylamino)naphthalene
New example of a symmetric NHN hydrogen bond in protonated 1,8-bis-(dimethylamino)naphthalene (DMAN) 441
Brillouin scattering
Brillouin and Raman scattering from liquid water 287

Carbohydrates
Hydrogen bonds and structure of carbohydrates 523
Carbon tetrachloride,
FT-IR study of *N*-tertiobutoxycarbonylproline-N′-methylamide self-association in carbon tetrachloride and influence of the solvent on the conformation 217
$CH_3NC\cdots HCN$
Ground-state rotational spectrum of $CH_3NC\cdots HCN$ and the nature of hydrogen bonds involving triply-bonded carbon 449
CH_4
The molecular orbital study of the structures and energies of bimolecular complexes of CH_4 and SiH_4 with water 87
Cobalt(II) porphyrins
Spectroelectrochemical studies of cobalt(II) porphyrins with paracyclophanyl, pyridinium and nucleoside subtituents 125
Correlation diagram
A large scale vibration correlation diagram for matrix-isolated and solution hydrogen-bonded complexes between water and different bases 141
Cryogenic solutions
Infrared spectra of weak hydrogen-bonded complexes in cryogenic solutions 351
Cyclic diethers
Cyclic diethers and short-range solvation: a bifurcated hydrogen-bond model for ether–amine bonding 187

Ether–amine bonding
Cyclic diethers and short-range solvation: a bifurcated hydrogen-bond model for ether–amine bonding 187

Formamide
Ab initio Hartree–Fock and post-Hartree–Fock studies on molecular

structures and vibrational spectra of formamide and formamidic acid 67
Formamidic acid
Ab initio Hartree–Fock and post-Hartree–Fock studies on molecular structures and vibrational spectra of formamide and formamidic acid 67
β-D-Fructopyranose
A variable low-temperature FT-IR study of crystalline β-D-fructopyranose and deuterated analogues 381

Hartree–Fock studies
Ab initio Hartree–Fock and post-Hartree–Fock studies on molecular structures and vibrational spectra of formamide and formamidic acid 67
Hydrates
Proton transfer in autoassociates and hydrates of pyrimidine bases: an MNDO/M study 459
Hydrogen carbonates
Proton-transfer dynamics in the hydrogen bond. Inelastic neutron scattering spectra of sodium, rubidium and caesium hydrogen carbonates at low temperature 339
Hydroxylamine
Ab initio molecular orbital calculations of the infrared spectra of hydrogen-bonded complexes of water, ammonia and hydoxylamine. Part 11. The atomic polar tensors, and their invariants, of the monomers and the binary hydrogen-bonded complexes 417

Inelastic neutron scattering
Proton-transfer dynamics in the hydrogen bond. Inelastic neutron scattering spectra of sodium, rubidium and caesium hydrogen carbonates at low temperature 339
Intramolecular hydrogen bond
Retinal Schiff bases with aromatic and aliphatic amino acids — the extremely different nature of the intramolecular hydrogen bond between the two types of compounds 11

Iodate crystals
NQR in hydrogen-bonded iodate crystals 517

Jahn–Teller
Pseudo Jahn–Teller origin of square-planar configuration instability of main-group-element hydrides 369
Jet-cooled
Vibronic spectroscopy of jet-cooled hydrogen-bonded clusters 301

Lattice vibration spectra
Lattice vibration spectra. Part LXXII. OH stretching frequencies of solid hydroxides — correlation with structural and bonding data 393
Lithium aluminosilicates
Hydrogen bonding in hydrogen-substituted lithium aluminosilicates 407
Low-temperature ^{1}H NMR
Study of mutual influence of hydrogen bonds in complicated complexes by low-temperature ^{1}H NMR spectroscopy 263
Low-temperature FT-IR
A variable low-temperature FT-IR study of crystalline β-D-fructopyranose and deuterated analogues 381

Main-group-element hydrides
Pseudo Jahn–Teller origin of square-planar configuration instability of main-group-element hydrides 369
1-Methyl-1,3,5,7-tetra-aza-adamantan-1-ium halide hydrates
Hydrogen bonding. Part 44. 1-Methyl-1,3,5,7-tetra-aza-adamantan-1-ium (*N*-methylhexamethylenetetramine cation) halide hydrates: IR and thermodynamic study of planar C_{2h} $(H_2O \cdot Br^-)_2$ and $(H_2O \cdot Cl^-)_2$ clusters, a possible C_{2h} $(H_2O \cdot I^-)_2$ cluster, and two higher Cl^- hydrates 19
Methylamine
Proton transfer between acetic acid and methylamine in aqueous solution.

Ab initio and molecular dynamics study of free energies of hydration 247

NH···N H-bonds
Semiclassical model calculations of NH···N H-bonds 229
NHN hydrogen bond
New example of a symmetric NHN hydrogen bond in protonated 1,8-bis-(dimethylamino)naphthalene (DMAN) 441
NQR
NQR in hydrogen-bonded iodate crystals 517

Pivalic acid
^{2}H and ^{17}O NMR studies of hydrogen-bond exchange and molecular motion in diluted pivalic acid 161
Potassium deuterium maleate
Polarized infrared spectra of potassium hydrogen maleate and potassium deuterium maleate single crystals 499
Potassium hydrogen maleate
Polarized infrared spectra of potassium hydrogen maleate and potassium deuterium maleate single crystals 499
Potential energy curves
Effect of the fluctuations of the potential energy curves ruling the motions of atoms on the thermodynamics of liquids 197
Proton transfer potentials
Analytic functions fit to proton transfer potentials 173
Proton tunneling
Analytical approach to the study of proton tunneling in symmetrical hydrogen bonds 33
Pyridines
X-ray, FT-IR amd PM3 studies of hydrogen bonds in complexes of some pyridines with trifluoroacetic acid 99
Pyrimidine
Proton transfer in autoassociates and hydrates of pyrimidine bases: an MNDO/M sudy 459

Raman scattering
Brillouin and Raman scattering from liquid water 287
Retinal Schiff bases
Retinal Schiff bases with aromatic and aliphatic amino acids — the extremely different nature of the intramolecular hydrogen bond between the two types of compounds 11
Rovibrational
Rovibrational states of a linear molecule 491

SiH_4
The molecular orbital study of the structures and energies of bimolecular complexes of CH_4 and SiH_4 with water 87
Siloxane group
Hydrogen bonding involving the siloxane group 205
Solid hydroxides
Lattice vibration spectra. Part LXXII. OH stretching frequencies of solid hydroxides — correlation with structureal and bonding data 393
Solvent effect
Solvent effect on the vibrational spectrum of a hydrogen-bonded complex 481
Symmetrical hydrogen bonds
Analytical approach to the study of proton tunneling in symmetrical hydrogen bonds 33

N-Tertiobutoxycarbonylproline-*N'*-methylamide
FT-IR study of *N*-tertiobutoxycarbonylproline-*N'*-methylamide self-association in carbon tetrachloride and influence of the solvent on the conformation 217
Trifluoroacetic acid
X-ray, FT-IR and PM3 studies of hydrogen bonds in complexes of some pyridines with trifluoroacetic acid 99
Triply-bonded carbon
Ground-state rotational spectrum of $CH_3NC\cdots HCN$ and the nature of

hydrogen bonds involving triply-bonded carbon 449

Water
A large scale vibration correlation diagram for matrix-isolated and solution hydrogen-bonded complexes between water and different bases 141
Ab initio molecular orbital calculations of the infrared spectra of hydrogen-bonded complexes of water, ammonia and hydroxylamine. Part 11. The atomic polar tensors, and their invariants, of the monomers and the binary hydrogen-bonded complexes 417
Brillouin and Raman scattering from liquid water 287
The molecular orbital study of the structures and energies of bimolecular complexes of CH_4 and SiH_4 with water 87
Water clusters
Theoretically predicted lowest-energy structures of water clusters 277
Water-dimer populations
A computational evaluation of the water-dimer populations in saturated steam recommended for applications to the Earth's, planetary and cometary atmospheres 1
